

FOAMING SUGAR SCRUB WITH JOJOBA GLAZE®- HV

A new form of the popular salt scrubs that provides abrasive exfoliation from the sugar that stops as soon as water is added and the sugar dissolves. In water, though, the **JOJOBA SPHERES™** provide continuing, non-abrasive smoothing for the skin. The **JOJOBA GLAZE®** provides a smooth, emollient base for the product that does not interfere with the foaming of the surfactant.

INCI NAME	TRADE NAME	WT. %
